Instruction

1 . Definition of LED Lighting Display

LED festoon lighting screen is a kind of display facility which is composed by many illuminant dots assembled from RGB LED lightening lamps, and revert to the true colorful picture. The main character is that: by day, only shown the logo or slogan of enterprise; while in the nighttime, the festoon lighting screen can play the video program in full colors, rolling caption, colorful pictures, flash and imitated fireworks etc.

LED festoon lighting screen is "enlarged" **LED display**. It is our new item, and can be widely used in the places which cannot install the traditional LED display before. From the view of cost, it is much lower than the LED display, while can be same function as LED display. Compared with the traditional LED display, LED festoon lighting screen improved a lot in the aspect of outlook, structure, display view, installation, view distance, weight etc. It is the best choice for the super huge LED display.

The famous business building installed the **LED festoon lighting screen** from LCJH. Such as: Macco Crown Hotel, HK Meagbox project, Bonanza Hotel & Spa, Shenzhen Yijing Central Walk etc. They are really satisfy with LCJH screens.

2. Advantages of LED festoon lighting screen

2.1 LCJH is awarded the patent right of strip LED aptitude luminescence module,the patent number is:
200720118840.3

2.2 Excellent impact of publicizing

by day, only shown the logo or slogan of enterprise; while in the nighttime, the festoon lighting screen can play the video program in full colors, rolling caption, colorful pictures, flash and imitated fireworks etc.

2.3、 Diversification of appearance

Option 1: LED strips + hollow out penetrate signboard words

Option 2: LED strips + hollow out painting alum. Advertising board

Option 3: LED strips + hollow out painting colorfull board + solid words

2.4、 High brightness

LED festoon lighting screen is a kind of display facility which is composed by many illuminant dots assembled from RGB LED lightening lamps. Thus, each illuminant dots is bright enough, and it can be seen from several miles at night.

2.5、 High rate of capability VS.price

The cost of LED festoon lighting screen is much lower than the traditional LED display, while it can play the same program as traditional LED display do. The small invest can be realized the large business value.

2.6 lamp stips is easy and flexible to be installed

The structure of LED festoon lighting screen is very legerity, and easy to be installed. The spaces between two lamp strips can be adjusted as you like.

2.7 To defend the rain and wind.

The lamp strips of lighting screen is made from silicone and aluminium alloy, it can be installed both Indoor and outdoor. The grade of wanter proof and dust proof have been reached to IP67. There are spaces between the two strips. So the lighting screen have only a little resistance to the wind when it is installed on the high building.

2.8 easy to repair

It is simple to install and disassemble the lamp strips of lighting screen. So it is easy to be repaired at any time.

2.9 safe and reliable

LED festoon lighting screen is matched with low-voltage power, then in avoid of the risks caused by high-voltage.

2.10 well-rounded product line

The famous business building installed the **LED festoon lighting screen** from LCJH. Such as: Macco Crown Hotel, HK Meagbox project, Bonanza Hotel & Spa, Shenzhen Yijing Central Walk etc. Our LED festoon lighting screen was improved and corrected for nearly 30 times. Now it is the 2nd generation of B01 mature product.
